

JESUS' LOVE IS EXPRESSED THROUGH HIS POWER

About 700 participants listened to a talk on Jesus' Love & Power at the Christian Ecumenical Worship Centre, Kuching, on the night of 24th June, 2011. After his talk Bro. Stephen Bong, Founder & Leader of the Holy Cross Ministry of Deliverance & Healing conducted a healing session.

Here are some of the testimonies received after the seminar...

1. A young woman, named Judy, in her thirties had a **lump on her left inner arm**, close to her wrist, which made it difficult to lift things with her left hand. During the healing session she felt warmth on her shoulder and noticed that the lump had become soft and much smaller. After that she was able to normally lift things with her left hand.
2. A woman had a **growth at her throat-neck** area. This growth had felt hard previously. After the healing session the growth felt soft. Three days later, when she went to give testimony to Bro. Stephen at the Holy Cross Centre, the growth had completely disappeared!
3. A child suffering from **severe asthma** who attended the healing session had been dressed-up warmly as a cold environment would normally trigger an asthma attack. The parents thought it odd when the child wanted to take off the warm clothing in the air-conditioned hall during the seminar because he "felt very warm". The next day all the usual symptoms of asthma the child normally experienced had disappeared.
4. A senior citizen who could not urinate properly due to a **prostate condition** was delighted that he could urinate normally after the healing session.
5. A middle-aged woman was suffering from **breathing problem and heart palpitations** had been diagnosed as having a "weak heart" by her doctor. During the healing session she experienced her palpitations and tried to stand up but fell back onto her seat. After that she found that she could breathe normally.
6. A woman who suffered abdominal discomfort and pain had earlier on gone for medical check-up. Her doctor suspected that she could be having a gastric problem but the medical examination was not able to show-up any abnormality. After the healing session, she experienced intense pain. This time the medical examination managed to detect that she was having **gall stones**. She underwent

- surgery at a private hospital, the result of which showed that she had 12 “stones”, the real source of her painful condition.
7. Doctors found that a child of four had a tumour in his brain and determined that the condition was too difficult to treat. The parents felt much despair due to the situation. During Bro. Stephen’s teaching, he mentioned that God is not only a “Healer” but that God is ALSO the **CREATOR**. These words of encouragement touched the child’s mother, enflaming her **HOPE** for her child. She went to Holy Cross Centre at Tabuan Jaya, Kuching, to share this with the leaders who were on duty during the week following the Kuching Seminar.
 8. A **wheel-chair-bound** woman of seventy-eight had continuous pain on one of her knees for several years and she was due for imminent surgery. She felt a tingling sensation during the healing session. The pain left her immediately, and three days later she could walk normally!
 9. During the part of the evening where participants were invited to **pray by proxy** for their loved ones who needed healing through their “thinking of them”, a woman interceded for her friend who had been under the intensive care for 8 days at a private hospital due to **fluid in the lungs**. Amazingly, the friend made a dramatic recovery and was transferred to a “normal ward” the very next day!
 10. A man who had suffered from a **stroke** had great difficulty moving his right arm. He was healed that very night, after which he could freely move his right arm without hindrance. (See picture).

Let us give praise and thanks for having witnessed the great love and power of our Lord & Saviour Jesus Christ!
